

Glass and Stainless Steel Cleaner Portfolio

PVA Hygiene provides an innovative and sustainable method of cleaning. As the UK's leading manufacturer of water-soluble cleaning products, we cover all areas of commercial cleaning. Over 24 years, we have developed a system using pre-dosed sachets that is straightforward to implement and balances environment diligence with commercial demands. Based in the South West of England, we distribute globally.

This portfolio contains documents relating to PVA Hygiene's GLASS AND STAINLESS STEEL CLEANER.

This unique formulation is contained within a PVOH or paper film that dissolves at the point of use. The sachets are dry, compact and light, they reduce storage space, transportation costs and heavily reduce the environmental implications often associated with delivering cleaning supplies. The sachets are packed in planet friendly packaging, that can either be composted or recycled, helping you to eliminate single-use plastic from your current cleaning procedure.

USE INSTRUCTIONS

Remove any gross debris from the surface, place one sachet into the empty trigger spray bottle and fill with water to the 750ml mark. Replace the trigger head and shake until the sachet has dissolved (note warm water will aid the rate of dissolution but is not essential). Lightly Spray the solution onto the surface. For vertical surfaces such as windows and mirrors it is advisable to spray solution as high as possible and allow it to run down. Wipe the surface with a suitable cloth and then buff to a shine with a lint free cloth or paper towel.

Note:- It is essential to spray lightly, over application will make buffing dry time consuming and risks a smeared finish.

The product should be used with care on highly molded/complex shapes made from Perspex and Acrylic plastic. Care should be taken of decorative print finishes.
