

Washing Up Sachets Portfolio

PVA Hygiene provides an innovative and sustainable method of cleaning. As the UK's leading manufacturer of water-soluble cleaning products, we cover all areas of commercial cleaning. Over 24 years, we have developed a system using pre-dosed sachets that is straightforward to implement and balances environment diligence with commercial demands. Based in the South West of England, we distribute globally.

This portfolio contains documents relating to PVA Hygiene's WASHING UP SACHETS..

This unique formulation is contained within a paper or PVA- OH film that dissolves at the point of use. The sachets are dry, compact and light, they reduce storage space, transportation costs and heavily reduce the environmental implications often associated with delivering cleaning supplies. The sachets are packed in planet friendly packaging, that can either be composted or recycled, helping you to eliminate single-use plastic from your current cleaning procedure.

When the sink/bowl is full, agitate the water by hand to ensure the detergent is fully mixed, take care not to place hands in scalding water.

Rinse gross debris from crockery, pans, glasses and utensils, then place in the washing up solution to clean. For heavily soiled items a few minutes soak will aid the removal of debris.
