

## ARTWORK GUIDELINES

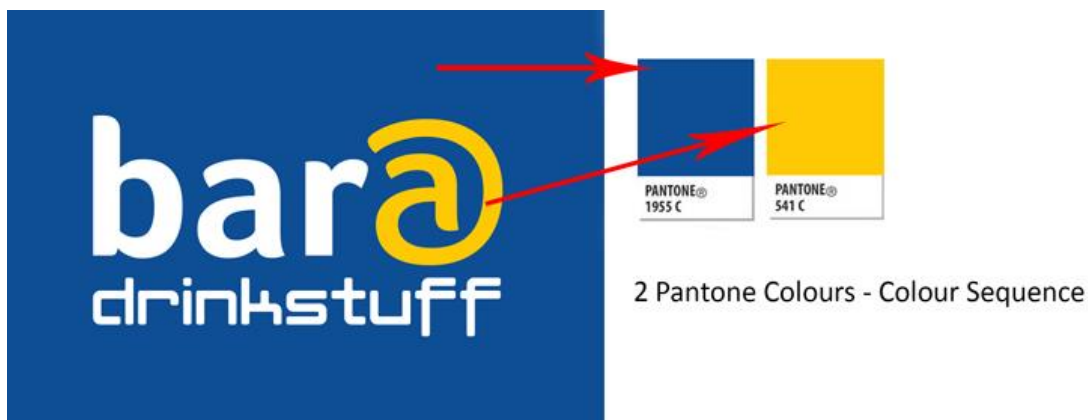

### Option 1. - Supplying us your logo

If you have chosen to have your greaseproof printed in black, 1 Pantone or full colour (CMYK) you can supply us a high resolution file in any of the following formats, please ensure all fonts are outlined and any images embedded @300dpi.

.jpg .pdf .ai .eps .tif

### IMPORTANT – 2 COLOUR PRINT

If you have chosen to have your greaseproof printed in **two colours** then we only accept 'ai. files or vector based .pdf' (a native Adobe Illustrator file).

**x2 Pantone solid spot references** should be indicated within this file – all fonts must be outlined and images embedded @300dpi.

.ai .pdf (vector based)

### What happens to your logo?

1. We will check over your supplied logo then lay it up multiple times on your requested sheet size.

2. We will email a PDF proof back to you for your final approval.
3. On your approval of the PDF proof we will print your greaseproof. Turn around time will usually be 7-10 working days.

## Option 2. - Supplying us your final artwork

If you have your artwork already laid out and have chosen to have it printed in **black, 1 Pantone colour or full colour (CMYK)** you should supply us a 'High resolution PDF' please ensure all fonts are outlined and any images embedded @300dpi. PDF files should be setup at the required greaseproof sheet size and include an additional 3mm of bleed on edge for trimming purposes.

If you are supplying us final artwork already laid out and have chosen to have it printed in **2 Pantone colours** please supply as above a 'High resolution PDF' but note that we only accept 'ai. files or vector based .pdf' (a native Adobe Illustrator file) and **x2 Pantone solid spot references** should be indicated within the file.
